PROFESSIONAL SUMMARY

AWS Certified Solutions Architect and Founding Engineer with 2+ years of experience. Expert in building 0-to-1 serverless SaaS platforms, AI systems, and resolving high-severity incidents for enterprise clients. Seeking to bring a high-ownership mindset to tackle scalable, enterprise-grade engineering challenges.

EXPERIENCE

Founder & Lead Engineer, My HRMS (formerly PeopleOps):

Mar 2025 – Present

- **Architecture & Security:** Architected a multi-tenant serverless backend using AWS CDK (IAC). Secured the platform with Cognito (Auth), Secrets Manager, Encryption, and strict RBAC to meet banking compliance standards.
- **Engineering Scalability:** Decoupled API Gateway from Lambda using SQS for bulk operations and implemented cursor-based pagination across APIs to ensure O(1) performance at scale. Utilised RDS Proxy to pool and effectively utilize connections from the Python based Lambda.
- **Complex Business Logic:** Engineered a configurable workflow system supporting multi-level approval chains and complex leave policies (proration/carry-forwards). Integrated automated payroll logic to handle dynamic salary structures, LOP/Overtime calculations, and statutory compliance hooks.
- **Attendance Intelligence:** Developed Geofencing-based attendance tracking with anomaly/outlier reporting and regularization workflows.
- **Business & Efficiency:** Led market research and pricing negotiations with a multi-branch cooperative bank. Designed a serverless architecture that eliminates 90% of idle infrastructure costs compared to traditional EC2-based equivalents.

Cloud Support Engineer I | Amazon Web Services (AWS):

Mar 2023 – Aug 2025

- **Architecture & Cost Optimization:** Consulted enterprise customers on cloud solutions, scaling strategies, and security strategies, achieving up to 80% latency reduction and 90% infrastructure cost savings through architectural reviews.
- **Incident Resolution:** Resolved 600+ complex technical issues, including feature architecture development, and 50+ high-severity (Sev-1) production outages, coordinating directly with service teams to restore operations for major global clients.
- **Escalation Management:** Onboarded to special escalation teams to handle business-critical cases across Europe and the US, achieving a near 100% customer satisfaction.
- **Mentorship & Process:** Built an internal upskilling tool that reduced new hire mentorship time by 60%, accelerating team readiness.

TECHNICAL SKILLS

- **Cloud & DevOps:** AWS CDK, CloudFormation, Docker, IAM, VPC, Lambda, API Gateway, EC2, ASG, S3, CloudWatch, X-Ray, CloudFront, Cognito, Secrets Manager, RDS Aurora, SQS, SNS, SSM, ALB, ELB, StepFunctions, CloudTrail, Route53, Redis.
- **CI/CD:** CodeCommit, CodePipeline, CodeBuild, CodeDeploy, GitHub Actions.
- **Languages:** Python, JavaScript, Dart (Flutter), SQL, PostgreSQL.
- **Web Development:** React.js, Node.js, Express.js, MongoDB, HTML5, CSS3, Firebase, REST APIs.
- **Tools & Methodologies:** Git, GitHub, Postman Collections, MVC Architecture, Agile.
- **AI & Tools:** HITL & Agentic development, RAG, MCP, Codex, Claude code, AI API integrations, local LLM powered for multi modal input and output generation.

ADDITIONAL PROJECTS

Phonecloud: Built an Android app to help distribute my local LLM inference workloads to my android phones. It uses a cloud-like (SQS, CloudWatch, alarms, load balancing, edge monitoring, ec2 like nodes, etc) architecture to manage, monitor and maintain the tasks. It helped me effectively bypass local hardware limits by distributing compute tasks across mobile edge nodes.

BountyBrain: Developed a Node.js app for automated bug discovery across software systems. Built an AI driven hypothesis and inference tester utilising graph-based chaining and a layered experience system to proactively identify vulnerabilities. This was built to integrate with my Phonecloud with tasks submitted via the queues, with context injection and async tasks.

EDUCATION & CERTIFICATIONS

- **B.Tech in Computer Science & Engineering | Vignan's Institute of Information Technology**
- **Amazon Web Services Solutions Architect (Associate) | AWS, YC Startup School | Y Combinator (Online)**
- **Foundations of Artificial Intelligence | NASSCOM, Certified Ethical Hacker Training (CEH v10) | Simplilearn**
